### Feel Better with Zinc\*

Zinc inadequacy is associated with a poorly functioning immune system.\* In addition, many studies show that zinc supplementation can support feelings of wellness.\* Zinc keeps the lungs strong and healthy.\* Plus, it's involved in other areas of health including comfortable joints, unblemished skin, and fertility in both men and women.\*

### Keep the Upper Respiratory Tract Healthy with Elderberry\*

Elderberry has been used in folk medicine for centuries to support the upper respiratory tract and sinuses.\* Modern research shows that elderberry maintains immune health in air travelers.\* In addition, a meta-analysis<sup>1</sup> of the medical literature including 180 participants found that elderberry supplementation is an effective way to support upper respiratory health.\*

### Power Up Immune Cells with Vitamin D3\*

Higher vitamin D levels are linked to staying healthy.\* Vitamin D3 supports immune cells like macrophages and T cells.\* Vitamin D in optimal amounts balances levels of proteins known as cytokines and keeps the lungs healthy.\* Inadequate levels are common due to time spent indoors, the use of suntan lotion, older age, and darker skin.\* This vitamin is also important for bones and the heart.\*
