PHYTO BENEFITS™

Age Gracefully with These Powerful Phytonutrients*

- Helps keep the heart and blood vessels healthy*
- Supports cognitive health during aging*
- Helps protect the skin from sun damage*
- Boosts energy during exercise*
- Helps maintain immunity*
- Helps to minimize free radicals*

As you age, keeping your brain and heart healthy and your immune system in peak working order means you'll be more likely to continue living independently well into your senior years.* One of the best ways to support healthy aging is by consuming plant-based compounds known as phytonutrients.* Because it's not always easy to get enough of these compounds from your diet, DaVinci® Laboratories created Phyto Benefits™, a supplement that includes some of the most powerful phytonutrients available.*

Supports Heart Health*

Ingredients like resveratrol, pomegranate, quercetin, and lycopene help maintain many aspects of cardio health, largely by promoting a healthy inflammatory response.* Lycopene may support healthy cholesterol levels.* Resveratrol and quercetin support healthy blood pressure levels already in the normal range and maintain healthy blood vessels.* Phytonutrients like BroccoPhane® from broccoli sprouts and resveratrol also encourage a healthy metabolic response by helping your body process glucose more efficiently.*

Promotes Brain Power*

Ingredients like green tea, pomegranate, quercetin, and lycopene support a healthy brain during the aging process.* They may reduce simple age-related memory problems, so you're less likely to forget where you put your cell phone or car keys.*

Helps Keep Skin Healthy After Sun Exposure*

Lycopene, broccoli sprout extract, and pomegranate help support skin health against sun exposure.* With these nutrients on your side, your skin can age more gracefully and remain smoother and looking healthy.*

Provides Immune Support*

Phyto Benefits features Meriva® curcumin, which is up to 30 times more bioavailable than other curcumin supplements and helps to support a healthy immune system along with green tea extract.* Quercetin helps to block histamine and reduce the sniffing, sneezing, and red eyes that occur during certain seasons of the year.*

Helps Boost Energy When You Exercise*

Scientists have studied pomegranates for their potential ability to improve exercise endurance and support normal muscle recovery after exercise.* Curcumin may also ease muscle soreness after a workout and help support normal recovery.*

Phyto Benefits™ is recommended for:

- Cardiovascular health*
- Maintaining healthy brain function*
- Normal age-related absentmindedness*
- People who get regular exposure to UV sun rays*
- Optimizing exercise endurance and normal muscle recovery*
- Supporting a calm immune system, even with seasonal challenges*
- Diets low in fruits and vegetables*

Suggested Use: As a dietary supplement, adults take one capsule daily, or as recommended by your healthcare practitioner.
