# PHYTO BENEFITS™

MADE WITH  
**NON  
GMO**  
INGREDIENTS

**Phyto Benefits™ is a dietary supplement designed to support oxidative balance and overall health.\***

This unique formula, part of DaVinci's® Benefits Line, provides evidence-based extracts from the most powerful botanicals in natural medicine.\* This compilation formulation covers the concerns associated with supporting healthy levels of oxidative stress, detoxification capabilities, metabolic processes and immune health.\*

In a health regimen for your patients, **Phyto Benefits™** can easily be used as an oxidative stress botanical multi option. It also can be used as a companion product to a standard multivitamin or to any aging protocol, such as one that includes Telomere Benefits™.

Oxidative stress can have far-reaching bodily effects, including on immune system function and metabolic health. Because free radicals are important to our bodies' functions, the goal of **Phyto Benefits™** is not to eliminate them, but to support normal balance between generation and elimination. Detoxification and reactive oxygen species (free radicals) are inextricably linked.

The plant compounds known interchangeably as phytonutrients or phytochemicals serve various functions for plant vitality. Legumes, herbs, spices and nuts are sources of phytonutrients; fruits and vegetables are concentrated sources. When we consume these phytonutrient-rich plants, we offer our bodies natural free radical scavenging support.

### Phyto Benefits™ supports:

- Healthy detoxification processes\*
- Overall oxidative balance\*
- Normal free radical production and scavenging\*
- Metabolic health\*
- Immune system function\*

### Phyto Benefits™ includes:

Broccophane®, a branded, researched version of broccoli sprout extract, sulforaphane, which Broccoli is one nutrient-rich plant food; a branded, researched version of its sprout extract, whose action involves its ability to support healthy modulation of the CYP enzymes, an important part of oxidative balance.

Green tea, whose major catechin, EGCG, has gained increased notoriety in natural medicine for its particular free radical scavenging activities.\* We also know that it supports normal tyrosine phosphorylation, which can in turn support healthy expression of iNOS and thereby normal rates of production of NO, a free radical.\*

Meriva®, a curcumin formulation designed for up to 30-fold greater bioavailability compared to standard extracts. Curcuminoids merge with free radicals to prevent further oxidation, and support normal inhibition of enzymes that participate in the synthesis of substances like prostaglandins and leukotrienes.\*

Lyc-O-Mato® lycopene, which supports the normal induction of phase II metabolizing enzymes.\*

Polygonum cuspidatum Root Extract, standardized to 50% trans-resveratrol. Trans-resveratrol works at the genetic level. Its principal mode of action supporting normal inhibition of certain phosphodiesterases (PDEs), enzymes that help regulate cell energy.\*

Quercetin, a flavonoid that supports normal histamine response.\*

P40™ (a pomegranate fruit extract), whose compounds support normal activation of multiple pathways related to oxidative stress, including the notable NF-κB pathway.

**Suggested Use:** As a dietary supplement, adults take one capsule daily, or as recommended by your healthcare practitioner.

## Supplement Facts

Serving Size 1 Capsule  
Servings Per Container 30 or 60

Amount Per Serving	% Daily Value
BroccoPhane® Broccoli ( <i>Brassica oleracea</i> ) Sprout Powder 100 mg (standardized to 4,000 ppm Sulforaphane)	*
Green Tea ( <i>Camellia sinensis</i> L.) Leaf Extract 100 mg (Standardized to 70% EGCG)	*
Meriva® ( <i>Curcuma longa</i> root extract/ Phosphatidylcholine complex) 100 mg	*
Pomegranate ( <i>Punica granatum</i> ) Fruit Extract 100 mg (Standardized to 40% Punicosides)	*
Quercetin Dihydrate 100 mg	*
Lycobeads® natural tomato extract 50 mg containing [5%] 2.5 mg Natural Lycopene	*
<i>Polygonum cuspidatum</i> Root Extract 50 mg (Standardized to 50% trans-resveratrol)	*

\*Daily Value not established.

Other ingredients: hypromellose (capsule), microcrystalline cellulose, vegetarian leucine.

**Warning:** If pregnant or nursing, consult your healthcare practitioner before taking this product.
