

COLLAGEN FLEX

Stay Active As You Age*

- Helps maintain healthy joints*
- Lubricates joint cartilage*
- Supports mobility as you age*
- Better absorbed than other collagens*
- Helps maintain smooth, youthful skin*
- Liquid supplement more convenient than powders

Staying active as you get older is important to maintain independence and to continue doing the things you love to do. That's why DaVinci Laboratories formulated Collagen Flex, which contains a special, highly absorbed form of collagen together with three other powerful joint support nutrients: hyaluronic acid, vitamin C, and biotin.* It also contains Cordyceps sinensis, a mushroom with powerful immune-support properties.* With this effective joint health supplement, you'll stay active as you age.*

Tap Into the Power of Collagen

Collagen is the primary building block for bones, tendons, ligaments, and cartilage, but levels decrease as we age.* Collagen Flex contains a novel type of fish-sourced collagen known as Morikol[®], which the body uses more effectively than regular collagen supplements.* That means it can be used at a lower dose and goes right to work optimizing your joint health.* Research¹ shows that Morikol[®] supports joint cartilage, maintains joint comfort, and reduces occasional mild joint discomfort after exercise.* Collagen Flex supports the health of the knee and hip, so you'll spend more time on the tennis courts, the golf course, or the hiking trails.*

A Trio of Other Joint Support Nutrients

Collagen Flex also contains hyaluronic acid (as sodium hyaluronate), vitamin C, and biotin. Hyaluronic acid in the body cushions the joints while vitamin C builds collagen.* Biotin plays a role in keeping muscles strong and joints healthy.* These three ingredients team up with Morikol[®] to maintain healthy joint function.* The result? You'll stay mobile and independent throughout your life.

A Convenient Liquid Collagen Supplement

Forget having to measure out messy collagen powders and hoping they blend in to your beverage smoothly. Liquid Collagen Flex is more convenient, tidy, and it mixes well. Just use the dropper to quickly put a tablespoonful into your favorite beverage.

Collagen Flex is recommended for:

- Those who want to stay active as they age*
- Maintaining comfortable, flexible joints*
- Supporting workout performance and recovery*
- Keeping your skin healthy as you age*
- People who don't like gritty, messy collagen powders

Suggested Use: As a dietary supplement, take 15 ml (approximately 1 tablespoon), once daily, or as directed by your healthcare practitioner. Shake well before each use.

Toasted Cinnamon
