

TONALIN[®]-CLA

Stay Slim Without Losing Muscle*

- Promotes healthy body weight*
- Helps eliminate stubborn, age-related fat accumulation in the abdominal area*
- Encourages a desirable physique by decreasing fat stores, yet increasing lean muscle*
- Helps boost energy*
- Maintains blood glucose, triglycerides and cholesterol within normal ranges*

Conjugated linoleic acid (CLA) is a fatty acid found in meat and full-fat dairy products that's known for its ability to support healthy weight and lean muscle mass.* The beneficial bacteria in your gastrointestinal tract, *Lactobacillus rhamnosus*, also produces CLA. Problem is, when you're trying to stay lean and slim you're probably not eating a lot of cheese and whole milk. Plus, if your gut microbiota is imbalanced due to factors like stress, antibiotics, or a less than ideal diet, your CLA levels will nosedive.* That's why DaVinci[®] Laboratories offers Tonalin[®]-CLA, a special form of CLA that ensures you're getting enough of this nutrient.* It's an ideal addition to any GLP-1-based weight management program and is free of the stimulants or filler ingredients sometimes found in body-sculpting supplements.*

Manage Your Weight While Toning Muscles*

Tonalin[®] brand CLA helps the body metabolize existing fat deposits.* Existing fat cells shrink and new fat cells are prevented from forming.* This fat then returns to the blood stream where it is used as energy by muscle cells and the liver.* Most weight loss approaches reduce not only fat mass, but muscle mass, leading to a slim appearance lacking in muscle tone. Tonalin[®]-CLA is a great way to reduce fat, while helping increase lean muscle mass at the same time.*

Boost Your Energy*

Tonalin[®]-CLA boosts metabolism and helps muscle cells break down fat to make energy more effectively.* The energy boost combined with support for lean muscle mass makes CLA an ideal option for weight lifters and body builders.* It's also a good choice for dieters who need to fuel their exercise and workouts at the gym.*

Helps Maintain Glucose Levels*

Studies have shown that CLA supports blood glucose levels within normal ranges.* CLA can promote healthy insulin levels and proper insulin sensitivity.* Keeping blood sugar stable can support a healthy appetite, maintain weight, and curb carbohydrate cravings.*

Support Healthy Cholesterol and Triglycerides*

Research also shows that CLA can keep cholesterol and triglycerides in the normal range.* This means it's helpful for maintaining cardiovascular and metabolic health.*

Tonalin[®]-CLA is recommended for:*

- Staying slim and toned*
- Increased endurance during exercise*
- Weight lifters and body builders*
- Supporting lean body mass while dieting*
- Maintaining a toned abdominal area*
- Cardiometabolic health*

Suggested Use: As a dietary supplement, take 1 softgel, 3 times daily with meals or as directed by your healthcare practitioner.
