

IMMUNO-DMG™

A Powerful Way to Support Your Immune System*

- Supports a healthy immune system*
- Encourages a large variety of immune cells*
- Provides seasonal support*
- Turns on a “switch” to good health, known as methylation*

A healthy immune system is critical to maintaining your health and wellness.* To help protect against immune challenges, DaVinci[®] Laboratories formulated Immuno-DMG™.* This unique immunity supplement is highly effective, thanks to four powerful ingredients, each of which play a role in immune support.*

Stay Healthy and Productive*

The ingredients in Immuno-DMG™ work together to fortify the cells that do much of the immune system’s heavy lifting, including antibodies, lymphocytes, macrophages, natural killer cells, B-cells, and T-cells.* With a strong array of immune cells, your immune system can be better supported against seasonal challenges.*

Dimethylglycine (DMG) supports resistance to immune threats by supporting normal production of antibodies and lymphocytes.* Larch tree (*Larix laricina*) contains a time-tested source of arabinogalactans, compounds known for encouraging the production of immune cells.*

Maitake mushroom is valued for strengthening both macrophages and natural killer cells, the body’s first line of defense during immune challenges.* The purified Maitake D-Fraction[®] is a well-researched form of maitake that has been studied in clinical trials.* It’s one of the most comprehensive immune-support ingredients available.*

Beta 1,3 glucans support the activation of important immune cells known as B-cells and T-cells.* Beta 1,3 glucans are derived from yeast, but carry no yeast proteins—they’re made from the cell wall of baker’s yeast, which is purified and free of common allergenic material.*

Flip the Switch to Good Health*

Methylation acts as a switch that can turn gene expression on or off.* Methylation is an important part of many aspects of health, including immunity, and is necessary for immature immune cells to progress to their mature and functional state.* DMG plays a role in methylation by providing the building blocks (methyl groups) required to make vitamins, hormones, neurotransmitters, antibodies, and other molecules.* By supporting methylation, DMG contributes to healthy immune function.*

Immuno-DMG™ is recommended for: *

- Supporting immune function all year long*
- Building defenses to support health during seasonal challenges*
- Supporting clear and comfortable sinuses*
- Managing lung and throat health*

Suggested Use: As a dietary supplement, take 1 tablet, 3 times daily, or as directed by your healthcare practitioner.

Supplement Facts

Serving Size 1 Tablet
Servings Per Container 90

Amount Per Serving	% Daily Value
N,N-Dimethylglycine HCl (DMG) 300 mg	*
Maitake PD-Fraction [®] Powder (<i>Grifola frondosa</i>) 17 mg yielding D-Fraction 5 mg	*
Larch Tree (<i>Larix laricina</i>) Arabinogalactan Powder 227 mg	*
Beta 1,3 Glucan (from baker's yeast cell walls) 100 mg	*

*Daily Value not established.

Other ingredients: microcrystalline cellulose, stearic acid, vegetable stearate, croscarmellose sodium, silicon dioxide, hydroxypropyl methylcellulose, titanium dioxide, polyethylene glycol.

Warning: If pregnant, nursing or have an auto-immune disorder or are taking immune suppressant or blood thinning medications, do not take this product without first consulting your healthcare practitioner.
