

LIPOSOMAL CBD

MADE WITH
**NON
GMO**
ingredients

Easily Absorbed CBD

- Leads to Enhanced Absorption of CBD
- Derived from High-Quality, Full-Spectrum Hemp

The endocannabinoid system is like a switch the body turns on to promote good health. It keeps bodily systems in balance, and it's so important that it's already working before birth.

Receptors known as CB1 and CB2 play an important role in this system. Compounds made in your body known as endocannabinoids act on these receptors. Think of CB1 and CB2 receptors as locks and endocannabinoids as keys. When endocannabinoid "keys" are "inserted" into these receptor "locks," it opens many doors to optimal health.*

The endocannabinoid system participates in many areas of health. Unfortunately, some people have an endocannabinoid deficiency.

A Revolutionary CBD Delivery System

Liposomal CBD from DaVinci Laboratories is a unique liquid form of this phytocannabinoid. The liposomal delivery system ensures maximum bioavailability, so your body can immediately begin to use CBD.*

The Advantages of Liposomal CBD:

- Protects CBD from break down in the stomach, so it reaches the bloodstream faster compared with other delivery systems.
- Convenient dropper system to find the right dose.
- Non-GMO and naturally flavored with a refreshing peppermint and spearmint taste.

Liposomal CBD from DaVinci[®] Laboratories is the most effective approach.

Suggested Use: As a dietary supplement, take 1 ml by dropper daily, or as directed by your healthcare practitioner. Shake well before each use.
