

DAILY BEST™ PRENATAL

Daily Best™ Prenatal is a dietary supplement that supports:

- Healthy pregnancy and lactation*
- Methylated B vitamin levels*
- Balanced gut bacteria w/ *Lactobacillus rhamnosus**
- Upper digestive function and nausea w/ Ginger Root Extract*

Aside from compiling the most clinically relevant and nourishing nutrient profile for a pre and post-natal formula, our focus was heavily concentrated on convenience and compliance. Pregnancy is hard enough, and when ingesting a prenatal supplement becomes a monumental task because of either the size of the pills or the number of pills per serving, compliance goes down and both mother and child can suffer.*

This 2 capsule formula boasts all of the most up-to-date forms of nutrients and is easily integrated into the daily routine of the new mother or mother-to-be.

Methylated B Vitamins

The role of folate has been solidified as an essential nutrient for an optimal pregnancy and healthy baby.* The other B vitamins have also proven to be very important for many functions including the baby's neurological development.* Daily Best Prenatal includes methylated B vitamins that are proving to be the gold standard when it comes to supplemental Bs. Methylated folate, is vital for a significant portion of the population, since some research suggests up to 30% of the population cannot metabolize un-methylated forms of synthetic folic acid.

Iron Bis-Glycinate

Iron is an important blood building nutrient for the baby as well as for the mother.* Low iron levels mean that new blood cells will be unable to transport sufficient levels of oxygen to the fetus. Daily Best Prenatal contains a clinically significant level of iron in its bis-glycinate form. This form is said to have a higher utilization rate in the body compared to other forms commonly used.

Digestive & Probiotic Support*

This comprehensive formula contains both ginger root extract to support nausea as well as *Lactobacillus rhamnosus*, the probiotic species that has been shown to provide key immune and digestive support to both mom and baby.*

Blood Sugar Support*

Both chromium, in the polynicotinate form, and inositol are leveraged in this formula for their ability to support normal insulin sensitivity and glucose metabolism.*

Suggested Use: As a dietary supplement, take 2 capsules daily, or as directed by your healthcare practitioner.

Supplement Facts

Serving Size 2 Capsules
Servings Per Container 30

Amount Per Serving	Adults %DV	Pregnant & Lactating Women %DV
Vitamin A (as Beta Carotene & Retinyl Palmitate) 1,200 mcg	133%	92%
Vitamin C (as Ascorbic Acid) 60 mg	67%	50%
