

SCALE DOWN[®]

A Dietary Supplement to Support Weight Management and Satiety*

Recommended For:

- Weight Management*
- Satiety Support*
- Cardiometabolic Support*
- Free-radical Fighting Support*

DyглоFit[®] is a natural, self-affirmed GRAS, standardized extract of *Dichrostachys glomerata* fruit. This fruit has a long history of use as a culinary spice and for medicinal purposes in West Africa.

Multi-patented **DyглоFit[®]** contains polyphenol bioactives that help provide healthy weight management and metabolic wellness benefits (“weight wellness”) via multiple mechanisms of action including enhancing leptin function.* These types of polyphenols may help enhance insulin sensitivity allowing more blood sugar to be used for energy and less converted to fat.*

DyглоFit[®] bioactives provide superior free-radical fighting protection to support cardiovascular health. Research indicates these types of polyphenols possess properties which help provide resistance to challenges associated with metabolic dysfunction.*

DyглоFit[®] elevates the standard in terms of “weight wellness” nutraceuticals as a result of its multiple mechanisms of action of **DyглоFit's[®]** polyphenol bioactive constituents and its convenient delivery system.*

These polyphenols possess mechanisms which include:

- 1) Enhanced insulin sensitivity support*
- 2) Advanced free-radical fighting protection*
- 3) C-Reactive protein support*

The Leptin Connection:

DyглоFit[®] helps support satiety mainly as a result of its influence over leptin functionality. Leptin is a master hormone produced by fat cells that regulates satiety, appetite control, and thermogenesis, and is associated with metabolic rate.*

Polyphenols, like those found in **DyглоFit[®]**, may help support healthy levels of C-reactive protein, which can bind with leptin and impair its ability to reach the brain and initiate the signal to the body that it is full.* When the leptin is unbound due to healthy levels of CRP brought about by the polyphenolic compounds found in **DyглоFit[®]**, the signalling capability is restored.*

The convenience of a great tasting, sweet mint liquid delivered in a pump format for easy adjustment to the serving size sets the stage for increased compliance and better clinical outcomes.*

Suggested Use: As a dietary supplement, hold nozzle 1” from mouth, spray five times and swallow. Use once or twice daily or as directed by your healthcare practitioner. Shake well before use.

Supplement Facts

Serving Size 1 ml (5 Sprays)
Servings Per Container 30

Amount Per Serving	% Daily Value
DyглоFit[®] <i>Dichrostachys glomerata</i>	
Fruit Extract 200 mg	*
Stevia Leaf Extract 5 mg	*
*Daily Value not established.	

Other ingredients: glycerin, water, ethyl alcohol, potassium sorbate, peppermint oil.

Warning: If pregnant or nursing, consult your healthcare practitioner before taking this product.
