LITTLE DaVinci® focus chewable

A Tasty Way To Keep Your Child Calm and Focused*

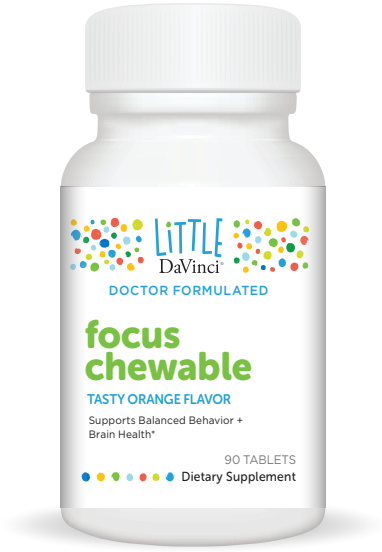
Behavioral issues and lack of focus make it harder for your child to play, perform, learn, interact, and feel confident.* That's why DaVinci® Laboratories has created **focus chewable**. This orange-flavored chewable delivers some of the most advanced and highly bioavailable nutrients that your child needs to stay calm and alert.* Plus, it's non-GMO and sweetened with stevia. Your child will love this yummy chewable and you will love that it's sugar-free.

focus chewable is designed especially for:

- Calm behavior, social skills, and sleep*
- Coping with stress*
- Mental focus*
- Immune system support*

Supporting Behavior and Social Skills*

focus chewable provides critical methylation nutrients that help improve children's behavior and social interaction.* Methyl groups are tiny chemicals needed to run countless cellular processes throughout the body.* Healthy methylation activity is especially important for children's mood, brain function, healthy blood cells, detoxification, and DNA information.* Healthy DNA allows kids' bodies to receive the correct instructions about how to develop and function.* DMG, betaine, vitamin B6, along with activated forms of folate and vitamin B12, work together to optimize your child's methylation pathways.*



- Dimethylglycine (DMG) supports behavior, eye contact, interactions with friends and family members, verbal skills, mental alertness, and brain function.* It also may boost energy and enthusiasm and support immunity.* It's a precursor to many amino acids and brain chemicals involved in your child's mental health and happiness.*

- Betaine (trimethylglycine) encourages calm behavior and more peaceful interactions with other children and family.* What's more, betaine helps the body better use amino acids, the building blocks for brain chemicals needed to stay relaxed and focused.*

- Vitamin B6 is involved in healthy behavior.* You'll notice better eye contact, less involuntary movements, and more interest and participation in activities.*

- Folate helps the brain use the amino acids it needs to function in a calm, stable manner.*

Stay Calm Under Stress*

Magnesium supports a calm mood when confronted with unexpected occurrences and everyday stressful situations.* The Sucrosomial® magnesium in **focus chewable** is especially easy for your child to absorb. DMG is also included in the formula to help your little one cope with stress.*

Improve Mental Focus*

Vitamin B12 boosts production of the brain chemical acetylcholine, which plays an important role in memory and learning.* Magnesium supports cognitive function and healthy brain activity.* Plus, magnesium reduces restlessness, so your child is more likely to sit still long enough to study and learn.*

Promote a Good Night's Sleep*

Magnesium and vitamin B12 promote restorative sleep, which repairs the brain so it can function at its best every day.* Vitamin B12 and the other methylation nutrients in **focus chewable** support healthy sleep patterns.*

Help your child's brain perform at its best, for a happier child and happier parents. You simply won't find a more complete and effective kids' behavior formula.*

Suggested Use: As a dietary supplement take:
4 - 11 years old: 1 tablet, twice daily
Over 12 years old: 1 tablet, 3 times daily or as directed by your healthcare practitioner.

Supplement Facts

Serving Size 1 Chewable Tablet
Servings Per Container 90
