

# LITTLE DaVinci® kiddOmega-3

Helping Your Kids Get Enough Omega-3s Has Never Been Easier

Grandmothers over the ages were right when they recommended that children take a spoonful of cod liver oil every day. Today science backs up grandma's wisdom: The omega-3 fatty acids in cod liver oil and fish oil boost brain health, help provide a healthy inflammatory response, support healthy joints, and help blood flow more smoothly.\* Unless your kids love to eat seafood, nuts, and seeds, chances are good they're not getting enough omega-3s. Instead, the typical modern diet is loaded with unhealthy and inflammatory omega-6 fatty acids from corn and corn-fed animal products. Long ago, our ancestors ate an equal amount of omega-3s and omega-6s. Today, Americans eat 15 to 30 times more omega-6s than omega-3s. It's the same for kids, and they're paying the price.

## Critical for Kids' Brain Function and Mental Health\*

The human brain contains a high amount of the omega-3 docosahexaenoic acid (DHA) and needs it in order to function at its best. Studies have shown that DHA is essential for healthy brain development in young kids. Fish oil with DHA and eicosapentaenoic acid (EPA) is also known to support memory, focus, and concentration in many kids. In addition, omega-3s can calm children's behavior, and they're mood-boosters, too.\*

## Glowing Good Health

Omega-3s help your kids thrive. These fish-oil-derived nutrients support respiratory health. They nourish and strengthen skin, nails, and hair. There's even evidence they can help with modern day concerns of parents such as maintaining children's healthy blood sugar and keeping young hearts healthy and strong.\*

## A Great-Tasting Way for Kids to Get Their Omega-3s

kiddOmega-3 is a monk-fruit sweetened omega-3 liquid that's easily added to food and drinks. Even your pickiest little ones will enjoy the taste. It boasts a high level of the omega-3 DHA, to support healthy brain function.\* Plus, kiddOmega-3 contains nourishing levels of the other important omega-3, EPA. Made from wild-caught fish, it meets the strictest standards to ensure it's pure and free from significant levels of heavy metals or contaminants.

## kiddOmega-3 is recommended for:

- Healthy brain development\*
- Supporting memory, focus, and concentration in kids\*
- Calm behavior\*
- Improved mood\*
- Healthy inflammatory response\*
- Respiratory health in children\*
- Maintaining normal blood sugar and heart health in kids\*
- Strong and healthy skin, hair, and nails\*
- Overall health\*

This convenient, great-tasting omega-3 liquid is the key to helping your child thrive.

**Suggested Use:** As a dietary supplement, children 4 or older take 1 teaspoon (5ml) daily, or as directed by your healthcare practitioner.
