

LITTLE DaVinci® skin and sneeze*

How a Cute Little Bird Can Calm Down Your Child's Immune Response*

When seasons change, things get miserable around your house. Whatever the reason, your kids are hit hard. Their eyes get red. They sneeze and sniffle. They can't sleep because their skin itches. They're frustrated and irritable. That's why Little DaVinci created **skin and sneeze**®. It's a product that supports a healthy immune response in kids.* And its main ingredient comes from a surprising source.

A Novel Way To Promote Respiratory Wellness in Kids*

There's a type of egg protein that can work wonders on respiratory health.* The Ancient Chinese first recognized its health-promoting properties.* Much later, a doctor began noticing that farmers who raised the type of bird that produces these eggs were healthier than other people in the area. A spouse of one of the farmers had less shortness of breath. What type of bird makes these eggs? We're talking about a specific subspecies of Japanese quail with powerful effects.* Supplementing with quail egg protein may support the ability to breathe more regularly through the nose after being exposed to common sneezing triggers such as grass and tree pollen, dust mites, and dog and cat dander.* Supplementing with Japanese quail egg may also support the immune response to better regulate histamines within normal ranges to reduce incidences of things like watery eyes and itchy noses.*

Maintaining a Healthy Immune Response*

The quail egg protein found in Little DaVinci's **skin and sneeze**® contains ovomucoids. These proactive proteins help maintain a healthy immune response.* How? By blocking potential invaders before they can activate immune cells. Many harmful foreign bodies contain protease enzymes. When these enzymes are inhaled, it spells trouble for tissues. The ovomucoids found in quail eggs stop these enzymes in their tracks. This in turn helps keep the immune system strong and healthy.* Even more good news: it doesn't cause drowsiness, so your child will stay alert while taking it.

Soothing the Skin*

Those same proteases that cause trouble in the mucous membrane of the nose also wreak havoc on the skin. The result? Your little one complains of itching and redness. Quail egg helps support the immune response and soothes the skin.* The side benefit of this is that it may also support improved sleep.*

Quercetin: Keeping Histamine in Check

Little DaVinci's **skin and sneeze**® also contains quercetin, a naturally-sourced histamine blocker found in fruits and vegetables. When mast cells are activated, they release histamine. This causes sniffing, sneez-

ing, skin discomfort, and red, watery, and itchy eyes. Quercetin helps to keep mast cells calm and stable, so they don't release histamine. Quercetin also promotes a healthy inflammatory response.* With both quail egg protein and quercetin, you can count on **skin and sneeze**® to give your little ones comprehensive coverage all year round.*

A Great-Tasting Burst of Lemon Cream

skin and sneeze® is kid-approved. It tastes like lemon cream candy, but is sugar-free. Plus, it has a liquid liposomal delivery system. This protects the ingredients from digestive enzymes and gastric acid so it's better absorbed and can go to work promoting your child's respiratory wellness and skin health.* It's great for kids who don't like to swallow pills.

skin and sneeze® is recommended for:

- Red, watery, and itchy eyes*
- Sneezing, sniffing, and stuffy nose*
- Comfortable and healthy skin*
- Appropriate immune response*
- Healthy mast cell activity and histamine balance*

With Little DaVinci® **skin and sneeze**®, you'll breathe more easily knowing your child's respiratory health is in good hands.

Supplement Facts

Serving Size 1 ml	
Amount Per Serving	
AllerGuard Express® Proprietary Japanese Quail (<i>Coturnix japonica</i>) egg powder	84 mg
Quercetin (as Quercetin Dihydrate)	8.4 mg
Stevia Leaf Extract	2 mg

Other Ingredients: water, glycerin, sunflower oil, sunflower lecithin, oleic acid polyglyceride, lemon oil, mixed tocopherols, citric acid, rosmarinic acid, potassium citrate, xanthan gum, microcrystalline cellulose.

Contains: Eggs.

Suggested Use: As a dietary supplement, take 1 ml by dropper daily, or as

AllerGuard
Express

AllerGuard Express® is a registered trademark of NutraGenesis, LLC.
