

# Advanced skin & coat support

Helps nourish skin, improve skin elasticity and strength, and promote soft and shiny fur.

Each chew contains the full spectrum of Omega 3, 6, and 9 fatty acids, plus added zinc, vitamins, and biotin.

Made with tasty duck flavor, perfect for pets sensitive to chicken protein.

## OMEGA PLUS

### Recommended for:

- › Skin & coat health
- › Breeds prone to occasional skin irritations
- › Advanced daily skin health support
- › Pets with sensitive or delicate skin
- › A shinier, healthier coat
- › Additional immune support
- › Dogs of all sizes and ages

**Omega Plus supports a healthy skin and coat with essential fatty acids, vitamins and amino acids in a convenient, flavorful soft chew.**

#### **Ingredient Highlights:**

##### › **Omega 3, 6 and 9**

Essential fatty acids support skin elasticity and texture and a shiny coat, as well as blood circulation and cellular integrity.

##### › **Biotin**

A vitamin that's been established as a vital ingredient for skin health, biotin is necessary for cell growth, production of fatty acids, and the metabolism of fats and amino acids.

##### › **Ascorbic acid (Vitamin C)**

Supports collagen production, contributes to skin texture and resiliency, and can help protect the skin from everyday stress.

##### › **Vitamins A and E**

Antioxidants that help protect against oxidative stress and free radical damage.

##### › **Vitamin B6 (Pyridoxine hydrochloride)**

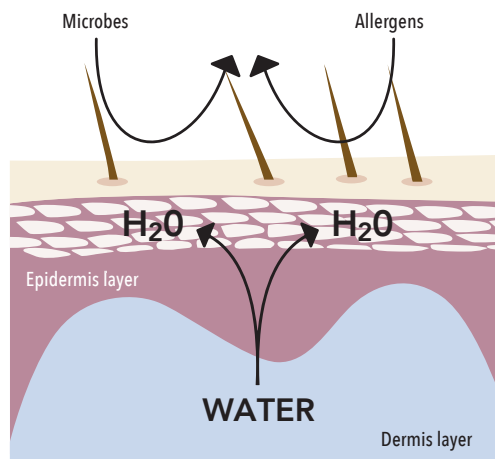

Vitamin B6 aids in the manufacture of proteins, and it is needed for the transfer of amino acids into the cellular interior to establish and maintain good skin condition. A deficiency of B6 impairs skin production and health.

##### › **Methionine and L-cysteine**

Two amino acids that are essential building blocks for proteins. Both support the elasticity of skin and act as antioxidants to protect against free radicals.

##### › **Zinc**

A critical mineral for the body's immune processes that is required both for the production of collagen and certain proteins and the repair and duplication of DNA. Zinc also helps with the production of a powerful antioxidant that supports the skin.

**Improved Skin Barrier**

#### **DUCK FLAVOR**

40 Chews
