

# GLYCOFLEX®

## +EVERYDAY

A GlycOmega™ Perna Product for Joint and Connective Tissue Support

**GlycoFlex® Everyday** is for dogs needing basic joint support. **GlycoFlex® Everyday** is recommended by veterinarians for puppies and dogs with an early need for joint support.

**GlycoFlex®** products contain GlycOmega™ brand *Perna canaliculus* from an exclusive New Zealand source. Unlike Perna extract-based products and mussel powders that may lack important fatty acids and other bioactive components (e.g. defatted powders or extracts), the entire organism is used in **GlycoFlex®**. Only **GlycoFlex®** products are formulated with GlycOmega™ Perna.

DMG is a naturally occurring amino acid derivative and a methyl donor that supports the body's metabolic processes. As an immune system promoter, DMG supports circulation, oxygen utilization, brain health, liver

health, cellular structure, cardiovascular health, as well as joint comfort and hydration.

Glucosamine has been shown to support the production of glycosaminoglycans (GAGs) within the cartilage matrix and synovial fluid. As dogs age, there is a decrease in the production of GAGs, which can result in joint stress, thinning of synovial fluid, and the breakdown of connective tissue. Glucosamine also supports bladder and urinary tract health by supporting the integrity of the mucosal lining.

**GlycoFlex®** bite-sized chews come in a chicken liver flavor that is highly palatable for easier delivery.

### ACTIVE INGREDIENTS PER 2 CHEWS:

<i>Perna canaliculus</i> . . . . .	600 mg
(GlycOmega™ brand Green-Lipped Mussel)	
Glucosamine HCl (Shrimp and Crab) . . . . .	500 mg
