

CARDIO STRENGTH™ Heart Support Formula

Cardio Strength™ is a formula designed to support cardiovascular health and function.

Cardio Strength™ combines the synergistic effects of 11 ingredients that are vital for elderly dogs and cats. Recommended to support cardiovascular and circulatory health.

Recommended for:

- » Dogs and cats with pre-existing sub-optimal cardiovascular functions
- » Breeds of dogs and cats that are predisposed to cardiovascular stress
- » Support of geriatric patients

Cardio Strength™ is designed to support heart muscles, reduce oxidative stress, and support cardiovascular functions. It also contains ingredients to support circulation and better utilization of oxygen.

About the Ingredients:

- » L-Taurine supports regular heartbeat, minimizes the loss of potassium, supports the proper use of electrolytes, and it provides antioxidant support to help to support the immune system
- » L-Carnitine supports the use of fat for energy and oxygen utilization. It supports fat metabolism, which helps balance cholesterol and triglycerides levels, as well as supporting the heart's energy levels.
- » N,N-Dimethylglycine (DMG) supports

circulation and acts as an antioxidant.

- » Vitamin E supports circulation and immune system health, as well as heart muscle strength. Vitamin E helps support tissue repair, normal blood clotting, blood pressure, strengthens capillary walls, and it is a powerful antioxidant.
- » Coenzyme Q10 supports oxygenation of the heart tissue and helps protect against oxidation. Coenzyme Q10 helps strengthen the heart muscle as a lipid soluble antioxidant.
- » Eicosapentaenoic Acid (EPA an omega 3 fatty acid) and gamma linolenic acid (GLA an omega 6 fatty acid) both support circulation and blood flow.
- » Folate, which is needed for the formation of red blood cells and, helps support capillary blood flow.
- » Magnesium supports proper functioning of the cardiac muscle. It helps to maintain the integrity of blood vessel walls, normal blood viscosity (thickness), and a strong normal heartbeat. Magnesium helps regulate electrical activity for the heart.
- » Potassium is needed for electrolyte balance, which is important for proper heart rhythm and blood pressure.
- » Selenium provides antioxidant support within the heart muscle. It is a component of glutathione peroxidase and works with vitamin E to maintain a healthy heart.

PRODUCT DETAILS:

Cardio Strength™ is recommended to support cardiovascular health in dogs and cats.

DIRECTIONS FOR USE:

Cats: Give 1 capsule daily.

Dogs: Give 1 capsule per 30 lbs of body weight, daily. If giving more than 1 capsule, divide between AM and PM.

ACTIVE INGREDIENTS PER CAPSULE:

L-Carnitine HCl	250 mg
L-Taurine	250 mg
N,N-Dimethylglycine HCl	50 mg
d-alpha Tocopheryl Succinate (Vitamin E)	30 IU
Eicosapentaenoic Acid (EPA) Powder Blend	25 mg
Coenzyme Q ₁₀	20 mg
Gamma Linolenic Acid (GLA) Powder Blend	10 mg
Folic Acid	0.9 mg
Magnesium (as Magnesium Citrate)	0.5 mg
Potassium (as Potassium Citrate)	0.1 mg
Selenium (as Sodium Selenite)	0.007 mg

Inactive Ingredients: rice flour, titanium dioxide (color), vegetable cellulose, vegetable stearate.
