

# EXPRESS EASE » A delicious stick to support anal gland health

**Express Ease** is a pumpkin based fiber product that supports proper stool consistency for anal gland health.

**Express Ease** supports fecal volume and healthy anal gland function. Unlike canned pumpkin or pumpkin treats, Express Ease provides immune, digestive and colonic support.

**Express Ease:**

- » Does not contain added wheat
- » Uses natural duck flavor
- » Provides 2 grams of fiber to help support anal gland health

**Express Ease provides 3 sources of fiber that support normal fecal volume and healthy anal gland function.**

Larch Tree Extract is a source of arabinogalactans, which have been shown to support the immune system and balance of beneficial bacteria. They are long, densely branched, water-soluble polysaccharides (or fibers) that occur naturally in most plant cell walls.

**Arabinogalactans:**

- » Work in the GI tract by supporting immune cells.

» Help maintain colon health by acting as a fermentable fiber to support balance of probiotic bacteria such as Lactobacillus and Bifidobacteria in the colon.

» Contribute to healthy microflora levels that are important for GI tract health.

**Digestion Resistant Maltodextrin is a soluble fiber that supports:**

- » Fecal volume
- » Proper bowel function
- » Regularity
- » Intestinal micro flora
- » A clean and healthy digestive tract

Pumpkin powder is a rich source of dietary fiber that benefits both normal stool formation and elimination.

Providing digestive and colonic support is important to the pet's overall health because digestive tract health is a primary factor in maintaining normal immune health, supporting the natural metabolism of nutrients, and maintaining a general sense of comfort and wellbeing.

**Express Ease** is designed to supply the necessary levels of fiber to support fecal quality that can help break an otherwise smelly cycle.
