

GLYCOFLEX[®] » +PLUS

Glucosamine, Chondroitin, MSM, Antioxidants, plus Perna Mussel for Dogs up to 30 lbs

GlycoFlex[®] Plus joint supplement for small dogs provides optimal nutritional hip and joint support for active and senior dogs under 30 pounds.

Small dogs like to run and jump too! **GlycoFlex[®] Plus** joint supplement for Small Dogs has been formulated to meet the joint support needs of dogs under 30 pounds. **GlycoFlex[®] Plus** is a new formula for hip and joint care that includes more active ingredients than other leading brands including glucosamine and chondroitin as well as perna and DMG all in a delicious duck-flavored chew. This advanced joint supplement for small dogs offers your active pup the right support to help alleviate the discomfort that often comes along with some of his favorite, everyday activities. An advanced joint support supplement for dogs of any age, **GlycoFlex[®]** is clinically proven to increase hind leg strength up to 41% in just four weeks*.

About our ingredients:

- » GlycOmega™ brand *Perna canaliculus* is a green-lipped mussel from an exclusive New Zealand source. Unlike *Perna* extract-based products and mussel powders, which may lack important fatty acids and other bioactive components (e.g. defatted powders or extracts), the entire organism is utilized in GlycOmega™ *Perna*. All **GlycoFlex[®]** products are formulated with GlycOmega™ *Perna*.
- » DMG is naturally produced in your pet's body. This essential nutrient supports physical and mental energy levels, efficient

oxygen utilization in tissues, and it acts as an antioxidant to maintain joint health.

- » Glucosamine has been shown to support the production of glycosaminoglycans (GAGs) within the cartilage matrix and synovial fluid. As your dog ages, there is a decrease in the production of GAGs, which can result in joint stress, thinning of synovial fluid, and the breakdown of connective tissue. Glucosamine also supports bladder and urinary tract health by supporting the integrity of the mucosal lining.
- » MSM is a source of organic sulfur. It supports the structure of joints and connective tissue. Increased availability of MSM is linked to comfort and mobility, as well as the support of collagen production.
- » Manganese is an essential mineral for the formation of collagen, GAGs, and proteoglycans, all of which support required cartilage integrity. A lack of manganese can lead to inefficient production of GAGs within the joints.

Antioxidants:

- » Vitamin C
- » Vitamin E
- » Grape Seed Extract
- » Selenium
- » L-glutathione

The antioxidants in our formula help support immune system response, proper detoxification function, free radical neutralization, as well as provide support for a healthy inflammatory response.

ACTIVE INGREDIENTS PER 2 CHEWS:

Glucosamine HCl (Shrimp and Crab) . . .	250 mg	L-Glutathione	1 mg
Methylsulfonylmethane (MSM)	250 mg	Selenium (Na Selenite)0001 mg
